● ABOUT ME

Experienced and passionate Front-End Developer specializing in React JS, Redux, HTML, CSS, and Tailwind CSS. With over 4 years of industry experience, I thrive on creating seamless user experiences and translating design concepts into efficient and visually appealing web applications.

I have successfully delivered numerous front-end projects throughout my career, leveraging my React JS expertise to build responsive and interactive interfaces. I deeply understand modern web development principles and best practices, consistently staying updated with the latest industry trends and technologies.

My skills extend beyond writing clean and maintainable code. I have a keen eye for design aesthetics, ensuring that user interfaces function flawlessly and provide an exceptional visual experience. I take pride in collaborating closely with cross-functional teams, including designers and backend developers, to create cohesive and impactful solutions.

I am committed to continuous growth and professional development, always seeking opportunities to expand my skill set and explore emerging technologies. As a driven front-end engineer, I am passionate about delivering high-quality code, optimizing performance, and creating intuitive user interfaces that leave a lasting impression.

● DIGITAL SKILLS

Web Development | React JS | NEXT JS | Javascript | Typescript | Redux/Redux Toolkit | Tailwind | CSS | Material UI/MUI | Git | JEST | React Testing Library | Firebase

● WORK EXPERIENCE

01/06/2021 – CURRENT Islamabad, Pakistan

SOFTWARE DEVELOPER MRS TECHNOLOGIES

- Core developer for a Home Automation product's front-end portal, responsible for user authentication using AWS Cognito.
- Developed functionality to fetch devices, scenes, automations, and other user information from AWS Amplify, involving comprehensive CRUD operations.
- Implemented real-time communication with devices via MQTT, maintaining and updating shadow data for seamless device management.
- Incorporated Redux Toolkit for global state management, ensuring efficient state handling and application performance.
- Utilized JEST and React Testing Library for robust unit testing, maintaining high code quality.
- Designed user interfaces with MUI and custom CSS for a polished and user-friendly experience.
- Developed and maintained main websites using Next.js and Tailwind CSS, integrated with Firebase for backend services.
- Actively participated in code reviews, ensuring adherence to best practices and high-quality standards.
- Engaged in discussions regarding new products, collaborating closely with design teams and backend teams to ensure smooth integration and functionality.

25/10/2019 – 25/05/2021 Rawalpindi, Pakistan

SOFTWARE DEVELOPER RNS SOLUTIONS (GENESIS LAB)

- Collaborated with design teams to ensure seamless integration and user experience.
- Worked with backend teams to ensure that frontend and backend work robustly and are performance optimized.
- Engaged in discussions with the testing team to maintain high-quality standards.
- Led the development of a cryptocurrency exchange project, implementing cutting-edge features and ensuring robust performance.
- Spearheaded the development of an ecommerce platform, enhancing user engagement and driving sales.
- Actively participated in code reviews to maintain code quality and best practices.
